PUBLICATIONS OF B.G. KONOPELCHENKO

I BOOKS

1. Nonlinear integrable equations. Recursion operators, group-theoretical and Hamiltonian structures of soliton equations, Lecture Notes in Physics, vol.270, pp.361, Springer, Berlin–Heidelberg, New York (1987).
2. Introduction to multidimensional integrable equations. Inverse spectral transform in 2+1-dimensions, Plenum P. C., New York (1992) pp.292.
3. Solitons in multidimensions, World Scientific, Singapore (1993) pp.294.

II RESEARCH ARTICLES

1. Discrete transformations in the six-dimensional model of the Minkowsky space, **Teor. Mat. Fyz.** (1970) **5**, 336.
2. (with Yu.B.Rumer) Field theory of the gravitational field sources, **Zh. Exp. Teor. Fyz.** (1973) **64**, 1119.
3. (with M.Ya.Palchik) Conformal invariance and anomalous dimensions, **Yad. Fyz.** (1974) **19**, 203.
4. (with M.Ya.Palchik) Field theory and conformal group, **Dokladi Akad. Nauk SSSR** (1974) **219** 1052.
5. Skeleton graph expansion in the conformal invariant field theory, **Lett. Nuovo Cimento** (1974) **9**, 456.
6. On symmetry on the homogeneous Schwinger–Dyson equation, **Lett. Nuovo Cimento** (1974) **11**, 271.
7. O'Raiferteag theorem for groups which contain the spinor generators, **Pisma v Z.E.T.F.** (1974) **20**, 687.
8. (with Yu.B.Rumer) Noncompact algebra SO(2.1) and the classification of potentials in the Schrödinger equation, **Dokl. Akad. Nauk SSSR** (1975) **220** 58.
9. (with Yu.B.Rumer) Classification of the codons in the genetic code, **Dokl. Akad. Nauk SSSR** (1975) **223** 471.
10. On the extensions of the Poincare algebra by spinor generators, **Pisma v Z.E.T.F.** (1975) **21**, 612.
11. On the extensions of the Poincare algebra by spinor generators, **Yad. Fyz.** (1976) **23**, 911.
12. On the spontaneous breakdown of symmetry, **Pisma v Z.E.T.F.** (1975) **22**, 424.
13. On the spontaneous breakdown of symmetry. Possible values of the Goldstone particle's spin, **Yad. Fyz.** (1976) **24**, 617.
14. Symmetry groups in the quantum field theory. **Physics of elementary particles and nucleous** (1977) **8**, 135.
15. Symmetry groups of completely integrable equations, **Yad. Fyz.** (1977) **26**, 658.
16. On the classical solutions of the field equations, **Yad. Fyz.** (1977) **26**, 1133.
17. On the unified description of symmetry groups, **Yad. Fyz.** (1978) **27**, 826.

18. The Nambu-Goldstone realisations of dynamical groups and nonlinear equations, **Yad. Fyz.** (1978) **28**, 537.

19. Completely integrable theories as theories of spontaneous breakdown, **Lett. Math. Phys.** (1979) **3**, 67.

20. Completely integrable equations: dynamical groups and their nonlinear realizations, **J. Phys. A: Math. Gen.** (1979) **12**, 1937.

21. (with V.G.Mokhnachev) On the group analysis of differential equations, **Yad. Fyz.** (1979) **30**, 559.

22. (with V.G.Mokhnachev) On the group-theoretical analysis of differential equations, **J. Phys., A: Math. Gen.** (1980) **13**, 3113.

23. Integrable equations and differential geometry, **Phys. Lett.** (1979) **72A**, 101.

24. On relativistic-invariant formulation of the inverse scattering transform method, **Lett. Math. Phys.** (1979) **3**, 197.

25. The linear spectral problem of arbitrary order: the general form of the integrable equations and their Bäcklund transformations, **Phys. Lett.** (1980) **75A**, 447.

26. On the structure of integrable evolution equations, **Phys. Lett.** (1980) **79A**, 39.

27. On the structure of the commutative Z_2 graded algebra valued integrable equations, **Phys. Lett.** (1980) **95B**, 83.

28. On the structure of equations integrable by the arbitrary order linear spectral problem, **Journal of Phys. A: Math. Gen.** (1981) **14**, 1237.

29. Transformation properties of the integrable evolution equations, **Phys. Lett.** (1981) **100B**, 254.

30. (with V.G.Mokhnachev) On Hamiltonian structure of integrable equations under the group and matrix reduction, **J. Phys., A: Math. Gen.** (1981) **14**, 1849.

31. The polynomial spectral problem of arbitrary order: a general form of the integrable equations and Bäcklund transformations, **J. Phys. A: Math. Gen.** (1981) **14**, 3125.

32. The two-dimensional matrix spectral problem: general structure and their Bäcklund transformations, **Phys. Lett.** (1981) **86A**, 346.

33. On the general structure of integrable equations and Z_N-type reductions, **Phys. Lett.** (1982) **108B**, 26.

34. Elementary Bäcklund transformations, nonlinear superposition principle and solutions of the integrable equations, **Phys. Lett.** (1982) **87A**, 445.

35. Integrable evolution equations: family of Hamiltonian structures and reductions, **Funk. Anal. Pril.** (1982) **16** (3) 63.

36. Hamiltonian structure of the integrable equations under matrix Z_N-reduction, **Lett. Math. Phys.** (1982) **6**, 309.

37. (with I.B.Formusatic) On the structure of nonlinear evolution equations integrable by the Z_2-graded quadratic Bundle, **Journal of Phys. A: Math. Gen.** (1981) **15**, 2017.

38. On the gauge-invariant description of the evolution equations integrable by Gelfand–Dikij spectral problems, **Phys. Lett.** (1982) **92A**, 323.

39. On the General Structure of Nonlinear Evolution Equations Integrable by the Two-dimensional Matrix Spectral Problem, **Commun. Math. Phys.** (1982) **87**, 105.

40. On the general structure of nonlinear evolution equations and their Bäcklund transformations connected with the matrix non-stationary Schrödinger spectral problem, **J. Phys. A: Math. Gen.** (1982) v.**15**, 3425.

41. Group-theoretical and Hamiltonian structures of integrable evolutions in 1+1 and 2+1 dimensions, in Group-theoretical methods in Physics, Proc. Intern. Seminar, Zvenigorod, 1982, v.II, p.355, Moscow, Nauka, 1983.

42. On the Adjoint Representation for spectral problems and its relation with the AKNS-method, Gauge transformations and Riemann Problem, **Phys. Lett.** (1983) **93A**, 379.

43. (with V.G.Dubrovsky) On the general structure of nonlinear equations integrable by the general linear spectral problem, **Phys. Lett.** (1983) **95A**, 457.

44. Nonlinear Transformations and Integrable Evolution Equations, **Fortschr. Phys.** (1983) **31**, Heft 5, 253.

45. General Structure of Nonlinear Evolution Equations in 1+2 Dimensions Integrable by the Two-dimensional Gelfand–Dikij–Zakharov–Shabat Spectral Problem and their Transformation Properties, **Commun. Math. Phys.** (1983) **88**, 531.

46. On the multidimensional evolution equations connected with multidimensional scattering problem, **Phys. Lett.** (1983) **93A**, 442.

47. On the integrable equations and degenerate dispersion laws in multidimensional spaces, **J. Phys. A: Math. Gen.** (1983) **16**, L311.

48. (with V.G.Dubrovsky) The General Form of Nonlinear Evolution Equations Integrable by Matrix Gelfand–Dikij Spectral Problem and their Group-Theoretical and Hamiltonian Structures, **Fortschr. Phys.** (1984) **32**, 25.

49. (with V.G.Dubrovsky) General N-th Order Differential Spectral Problem: General Structure of the Integrable Equations, Nonuniqueness of Recursion Operator and Gauge Invariance, **Annals of Physics (NY)** (1984) **156**, 265.

50. (with V.G.Dubrovsky) Hierarchy of Poisson brackets for elements of a scattering matrix, **Lett. Math. Phys.** (1984) **38**, 273.

51. (with V.G.Dubrovsky) Some new integrable nonlinear evolution equations in 2+1-dimensions, **Phys. Lett.** (1984) **102A**, 15.

52. (with V.E.Zakharov) On the theory of recursion operator, **Commun. Math. Phys.** (1984) **94**, 483.

53. Hamiltonian structure of the general integrable equations under reductions, **Physica** (1984) **D15**, 305.

54. (with V.G.Dubrovsky) Bäcklund–Calogero group and general form of integrable equations for the two-dimensional Gelfand–Dikij–Zakharov–Shabat problem. Bilocal approach, **Physica** (1985) **D16**, 79.

55. (with V.G.Dubrovsky) Bäcklund–Calogero group for the general differential spectral problem of an arbitrary order, **J. Phys. A: Math. Gen.** (1985) v.**18**, 1872.

56. (with M.Boiti and F.Pempinelli) Bäcklund transformations via gauge transformations in 2+1-dimensions, **Inverse problems** (1985) **1**, 35.

57. On a non-local formulation of the inverse-scattering transform method, **Inverse problems** (1985) **1**, L29.

58. General structure and properties of the integrable nonlinear evolution equations in 1+1 and 2+1 dimensions, **Lecture Notes in Physics** (1986) **246**, 267.

59. (with V.G.Dubrovsky) The hierarchy of the Poisson brackets between the elements of the scattering matrix for the general differential spectral problem, **Inverse Problems** (1986) **2**, 433.

60. (with M.Boiti) Nonformal recursion operators and nonlinear integrable evolution equations, **Lett. Math. Phys.** (1986) **12**, 97.

61. Method of recursion operator for pseudo-differential spectral problems. I. Dispersive long waves equations, **Phys. Lett.** A(1986) **116**, 231.

62. On spectral problems and compatibility conditions in multidimensions, **J. Phys. A: Math. Gen.** (1987) **20**, L1057.

63. The two-dimensional second-order differential spectral problem: compatibility conditions, general BTs and integrable equations, **Inverse Problems** (1988) **4**, 151.

64. Recursion and group structures of the integrable equations in 1+1 and 1+2 dimensions. Bilocal approach, **Inverse Problems** (1988) **4**, 785.

65. On the generalization of the Bäcklund–Calogero transformations, **J. Phys. A: Math. Gen.** (1988) **21**, L743.

66. On operator representation of integrable equations, **Modern Phys. Lett.** (1988) **A3**, 1807.

67. Recursion and group structures of the integrable equations in 1+1 and 1+2 dimensions. **Acta. Math. Appl.** (1989) **16**, 75.

68. (with B.T.Matkarimov) Inverse spectral transform for the Ishimori equation, **Phys. Lett.** (1989) **135A**, 183.

69. (with B.T.Matkarimov) Inverse spectral transform for nonlinear evolution equation, generating the Davey–Stewartson and Ishimori equations, **Stud. Appl. Matt.** (1990) **82**, 319–359.

70. Eigenfunction equations in Sato theory, **J. Phys. A: Math. Gen.** (1990) **23**, L609–612.

71. On exact solutions of nonlinear integrable equations via integral linearasing transforms and generalized Bäcklund–Darboux transformations, **J. Phys. A: Math. Gen.** (1990) **23**, 3761–3768.

72. (with B.T.Matkarimov) Inverse spectral transform for the Ishimori equation. I. Initial value problem, **J. Math. Phys.** (1990) **31**, 2737.

73. (with C.Rogers) Bäcklund and reciprocal transforms: in: Nonlinear equations in the Applied Science Press, Ed. by C.Rogers and W.Ames (1991) p.317–362.

74. Soliton eigenfunction equations: the IST integrability and some properties, **Reviews in Math. Phys.** (1990) **2**, 399–440.

75. (with B.Fuchssteiner and S.Carillo) The dynamics of eigenfunctions for soliton equations: the action-angle transformations, **Rend. Mat. E. Appl.** (1991) **11**, N2-C, 351–376.

76. (with W.Strampp) On the structure and properties of the singularity manifold equations of the KP-hierarchy, **J. Math. Phys.** (1991) **32**, 40–49.

77. (with V.G.Dubrovsky) The coherent structures of the Ishimori equation. I. Localised solitons with the stationary boundaries, **Physica D.** (1991) **48**, 367–395.

78. (with R.Beals) On nontrivial interactions and complete integrability of soliton equations, **J. Math. Phys.** (1991) **10**, 2695–2702.

79. (with W.Strampp) The AKNS hierarchy as symmetry constraint of the KP hierarchy, **Inverse Problems** (1991) **7**, 417–429.

80. The non-abelian (1+1)-dimensional Toda lattice as the periodic fixed point of the Laplace transform for (2+1)-dimensional integrable system, **Physics Letters A.** (1991) **156**, 221–222.

81. (with Y.Sidorenko and W.Strampp) (1+1)-dimensional integrable systems as symmetry constraints of (2+1)-dimensional systems, **Physics Letters A.** (1991) **157**, 17–21.

82. (with C.Rogers) On (2+1)-dimensional nonlinear systems of Loewner type, **Physics Letters A.** (1991) **158**, 391–397.

83. (with V.G.Dubrovsky) On the inter-relation between the solutions of the mKP and KP equations via the Miura transformation, **J. Phys. A: Math. Gen.** (1991) **24**, 4315–4324.

84. The inverse spectral transform for 2+1-dimensional Gardner equation, **Inverse Problems** (1991) **7**, 739–753.

85. (with V.G.Dubrovsky) Localised solitons for the Ishimori equation, **Contemporary Math.** (1991) **122**, 77–89.

86. (with V.G.Dubrovsky) The inverse spectral transform for the modified Kadomtsev–Petviashvili equation, **Stud. Appl. Math.** (1992) **86**, 219–269.

87. (with V.G.Dubrovsky) Coherent structures for the Ishimori equation. II. Time-dependent boundaries, **Physica D.** (1992) **55**, 1–13.

88. (with W.Strampp) Reductions of 2+1-dimensional integrable systems via mixed potential-eigenfunction constraints, **J. Phys. A: Math. Gen.** (1992) **25**, 4399–4411.

89. (with W.Strampp) New reductions of the KP and 2DTL hierarchies via symmetry constraints, **J. Math. Phys.** (1992) **33**, 3676-3686.

90. (with W.Oevel) Sato theory and integrable equations in 2+1-dimensions, in Proc. NEEDS 91, World Scientific, Singapore (1992).

91. (with W.Oevel) An r-matrix approach to nonstandard classes of integrable equations, **Publ. RIMS, Kyoto Univ.** (1993) **29**, 581-666.

92. (with V.G.Dubrovsky) The 2+1-dimensional integrable generalisation of the sine–Gordon equation. I. $\bar{\partial}-\partial$ dressing and initial value problem, **Stud. Appl. Math.** (1993) **90**, 189-223.

93. (with V.G.Dubrovsky) The 2+1-dimensional integrable generalisation of the sine–Gordon equation. II. Localised solutions, **Inverse Problems** (1993) **9**, 391–416.

94. (with C.Rogers) On generalised Loewner systems: novel integrable equations in 2+1-dimensions, **J. Math. Phys.** (1993) **34**, 214–242.

95. (with W.Schief and C.Rogers) A 2+1-dimensional sine–Gordon system: its auto-Bäcklund transformation, **Phys. Lett. A.** (1992) **A172**, 39-48.

96. (with R.Carroll) $\bar{D}$-dressing and Sato theory, **Lett. Math. Phys.** (1993) **28**, 307–319.

97. On the $\bar{\partial}$-dressing method: $\bar{\partial}$-dressing on nontrivial background and exact solutions of the special Zakharov–Manakov system, in Proc. NEEDS 92, World Scientific, Singapore (1993).

98. (with W.K.Schief) Lamé and Zakharov–Manakov systems: Comberscure, Darboux and Bäcklund transformations, preprint AM93/9, UNSW, Sydney (1993).

99. Nets in R^3, their integrable evolutions and DS hierarchy, **Phys. Lett. A.** (1993) **183**, 153-159.

100. (with J.-H.Lee) The Harry Dym equation on the complex plane: inverse spectral transform and exact solutuions,**Teor.Mat.Fyz.** (1994) **99**, 337-344.

101. (with V.G.Dubrovsky) DBAR-dressing and exact solutions for the 2+1-dimensional Harry Dym equation,**J.Phys.A:Math.Gen.** (1994) **27**, 4619-4628.

102. Multidimensional integrable systems and dynamics of surfaces in space, in:"National Workshop on Nonlinear Dynamics", (Eds. M Costano et al), Soc.Ital.Fisica, Bologna, Italy, 1995, pp.33-40.

103. (with J.-H.Lee) Inverse spectral transform for the Harry Dym equation on the complex plane, **Physica D.** (1995) **81**, 32-43.

104. (with L.V.Bogdanov) Lattice and q-difference Darboux-Zakharov- Manakov systems via DBAR-dressing method, **J.Phys.A:Math.Gen.** (1995) **28**, L173-L178.

105. Solitons of curvature, **Acta Applic. Math.** (1995) **39** 379- 388.

106. (with I.A.Taimanov) Generalized Weierstrass formulae, soliton equations and Willmore surfaces, Preprint No 187/1995, Bochum Univ., 1995.

107. Induced surfaces and their integrable dynamics, **Stud. Appl. Math.** (1996) **96**, 9-51.

108. (with R.Carroll) Generalized Weierstrass-Enneper inducing, conformal immersions and gravity, **Intern.Journal Mod.Phys.A** (1996) **7**, 1183-1216.

109. Surfaces of revolution and their integrable dynamics via the Schrodinger and KdV equations, **Inverse Problems** (1996) **12**, L13- L18.

110. (with I.A.Taimanov) Constant mean curvature surfaces via an integrable dynamical system, **J.Phys.A:Math.Gen** (1996) **29**, 1261- 1265.
